The values of f , P_1 , P_2 , and their first derivatives agree at $x = 0$. The values of the second derivatives of f and P_2 agree at $x = 0$.

41. (a)

(b) When x increases without bound, $1/x$ approaches 0, and $e^{1/x}$ approaches 1. Therefore, $f(x)$ approaches $2/(1+1) = 1$. Thus, $f(x)$ has a horizontal asymptote at $y = 1$. As x approaches 0 from the right, $1/x$ approaches ∞ , $e^{1/x}$ approaches ∞ , and $f(x)$ approaches 0. As x approaches 0 from the left, $1/x$ approaches $-\infty$, $e^{1/x}$ approaches 0, and $f(x)$ approaches 2. The limit does not exist, because the left limit does not equal the right limit. Therefore, $x = 0$ is a nonremovable discontinuity.
